

This list details the order in which lab results will display in eChart.
 The current lab sources that send results to eChart are Diagnostic Services, Cadham and Dynacare. This hierarchy represents all tests from all sources (historic and current) between Diagnostic Services, DSM- Brandon, Cadham, Dynacare, and Unicity labs.

Notes:

- Not all lab sources will use all of the LOINC codes specified below
- Where more than one LOINC code appears for a particular test this is because at least one lab is performing a different test which has been mapped to a different LOINC
