

Starting today, eChart will begin receiving visit history information from 22 Prairie Mountain Health (PMH) hospital and health centres within the Brandon and Assiniboine areas. With these additions, all PMH facilities are now sending this encounter information to eChart. Encounter documents display administrative data from visits such as visit type, facility attended, date of encounter, and discharge date. Visit history can be found in the Encounters list pane.

Visit the eChart [Frequently Asked Questions](#) to learn more about visit history information in eChart.

Below is an example of the administrative details that eChart will receive from these visits.

BRANDON, Echart test | 11-Jul-1993 (30y) | Female | PHN 123456004
